Useful Xcode Tip 💡

Show build operation duration

learnandcodewithenid.go.studio

Show Build Operation Duration

Build Succeeded | Today at 12:05
Build Succeeded | 5.007s

1 Open Terminal
2 Run the command below

```
defaults write com.apple.dt.Xcode ShowBuildOperationDuration YES
```

or just copy the text in the description

shadow() modifier in SwiftUI 💡

learnandcodewithenid.go.studio

Understanding Color

22

shadow()

shadow() modifier just adds a shadow behind the view.

Behind the scenes

```
import SwiftUI

struct ContentView: View {
    var body: some View {
        Color.purple
            .frame(width: 300, height: 200)
            .cornerRadius(50)
            .shadow(
                color: .purple,
                radius: 10,
                x: +10,
                y: 10
            )
    }
}
```
